

Accessibility Statement

We are committed to ensure that the Open Government Data (OGD) Platform India - data.gov.in - is accessible to all users irrespective of device in use, technology or ability. It has been built, with an aim, to provide maximum **accessibility and usability** to its visitors particularly for people with disabilities. For example, a user with visual disability can access this Website using assistive technologies, such as screen readers and magnifiers.

We also aim to be standards compliant and follow principles of usability and universal design, which should help all visitors of this Website

This Website is designed to meet priority 2 (level AA) of the Web Content Accessibility Guidelines (WCAG) 2.0 laid down by the World Wide Web Consortium (W3C). Part of the information in the Website is also made available through links to external Web sites. **External Web sites are maintained by the respective agencies that are responsible for making these sites accessible.**

If you have any problem or suggestion regarding the accessibility of the OGD Platform, please use the '[Feedback](#)' or '[Contact Us](#)' page to enable us to respond in a helpful manner.

Learn about accessibility features

- **Skip to Main Content:** Quick access to the core content on the page is provided without going through repetitive navigation using the keyboard.
- **Skip to Navigation:** Quick access to the **Navigation** pane is provided that enables accessing the different sections, such as **Data Catalog, Apps, Communities etc.**
- **Accessibility Options:** Options to change the size of the text and set a color scheme are provided. A color blind or low vision person to access this Website, the color theme change or text size change may be required to help browse through the pages. For example, one can use this option to increase the size of the text for clear visibility and better readability.
- **Descriptive Link Text:** Brief description of a link is provided using descriptive phrases instead of just using words such as 'Read more' and 'Click here' as linked text. For example, if a link opens a PDF file, the description specifies its file size. Further, if a link opens a Web site in a new window, the description specifies same.
- **Table Headers:** The table headings are marked and associated with their corresponding cells in each row. For example, if there are 30 rows and 5 columns in a table, it is difficult for a user with visual disability to make out which data cell belongs to which header. In this situation, an assistive device such as a screen reader can read the column header of any cell for the user. In addition, captions are also specified for each table that act as labels and indicate what data is provided in the table.
- **Headings:** The Web page content is organized using appropriate headings and subheadings that provide a readable structure. H1 indicates the main heading, whereas H2 indicates a subheading. In addition, for the screen reader users, there are hidden headings in this Website that are read out by a screen reader for better readability. For example, the **Navigation** pane has been given a hidden heading as **Global Navigation**.
- **Titles:** An appropriate name for each Web page is specified that helps you to understand the page content easily.
- **Alternate Text:** Brief description of an image is provided for users with visual disability. If you are using a browser that supports only text or have turned off the image display, you can still know what the image is all about by reading the alternate text in absence of an image.

- **Explicit Form Label Association:** A label is linked to its respective control, such as text box, check box, radio button, and drop-down list. This enables the assistive devices to identify the labels for the controls on a form.
- **Consistent Navigation Mechanism:** Consistent style of presentation throughout the Web site is incorporated.
- **Expandable and Collapsible Lists:** Lists of items are provided that can be expanded to view a list of sub items or can be shrunk using a keyboard, mouse, or screen reader. There are many Web pages in this Website that contain expandable and collapsible lists. Each item in the list is preceded by the '+' symbol that indicates its expandable state. This symbol has been given alternate text to enable the screen readers to identify the state of the symbol to notify users with visual disability. When the '+' symbol is clicked, it changes to '-' that indicates its collapsible state. Further, the alternate text is updated to indicate the same and a list of sub items is displayed. If now the '-' symbol is clicked, it changes to '+'. Further, the alternate text is again updated and the list of sub items goes away, which is referred to as collapsing.
- **Keyboard Support:** The Website can be browsed using a keyboard by pressing the **Tab** and **Shift + Tab** keys.
- **JavaScript Independent:** Web page information and functionalities are independent of JavaScript, irrespective of the browser support for the scripting language.

Learn about accessibility options

Do you find it difficult to read the contents on the screen?

Is the displayed information not clearly visible to you?

If yes, use the accessibility options provided by this Web site to control the screen display. These options allow changing the text size and color scheme for clear visibility and better readability.

Changing the Text Size

Changing the size of the text refers to making the text appearing smaller or bigger from its standard size. There are five options provided to you to set the size of the text that affects the readability. These options are available right on the header section of the Home Page:

A+ : On clicking this icon page font size would increase to two levels. The % of increase can be customized through the Content Management System.

A : Displays information in a standard font size, which is the default size.

A- : On clicking this icon page font size would decrease to two levels. The % of decrease can be customized through the Content Management System.

Changing the Color Scheme

Changing the color scheme refers to applying a suitable background and text color that ensures clear readability. There are six options provided to you to change the color scheme. These are:

Various Colors: Applies the selected color as the background and suitable colors to the text on the screen to improve readability.

High Contrast: Applies the black color as the background and suitable colors to the text on the screen to improve readability.

Standard Contrast: Brings the screen back to its original appearance.

Note: Changing the color scheme does not affect the images on the screen.
